Page view breakdown

Browser Parse document.

↳ Browser loads resource & complete relevant page-load work.

Median | Average | Histogram | Percentile

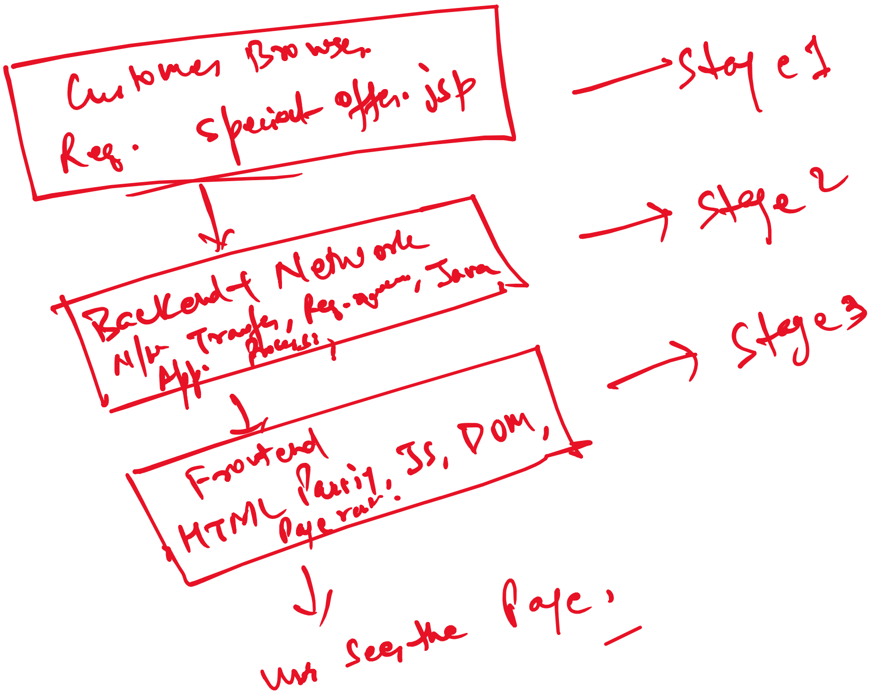
Front-end vs back-end View in Distributed tracing View in APM

→ where page load time is spent.

Throughput of page loads
Page views per minute

0 ppm
Average

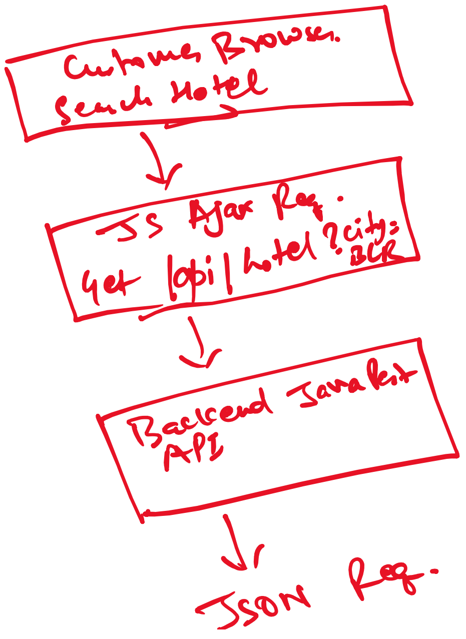
↳ No. of recorded page view over time.



Ajax Request :- Async. JS & XML

XMLHttpRequest
fetch()

Get	/api/destination	120ms	200
Get	/api/notification	100ms	200



4xx |api|

JSON Req.

Page load w/o Full reload

Page click:-

Submit

3-4

respond.

Session-001

Login → search → Book → Confirmation → logout.

User journey

Synthetic Monitoring:-

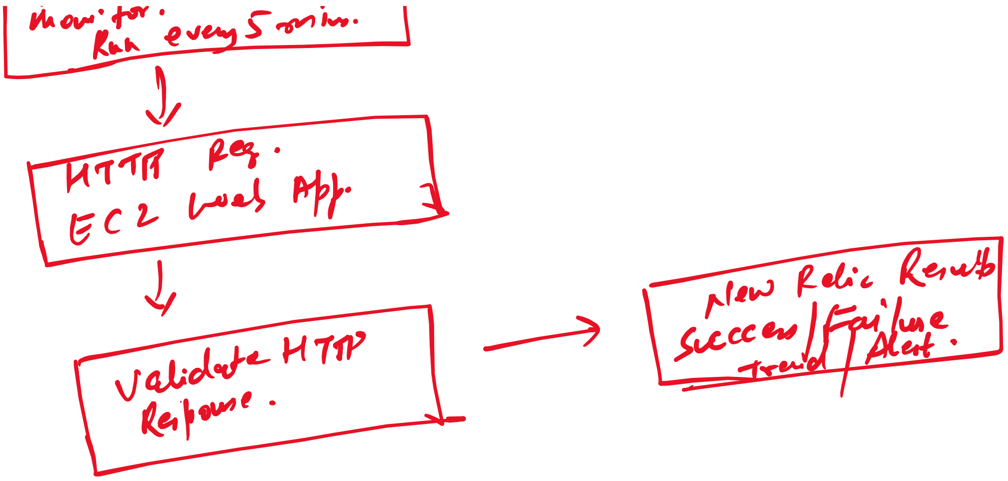
Browser Monitoring → Real.

Synthetic Monitoring → Simulate req. or User journey at the schedule intervals.

HTTP → 200

1. Ping. → Verify easy_Travel Homepage.
2. Simple Browser → check Page.
3. Scripted Browser. → Multistep user journey.
4. API Test → Validate API response, status & content.

New Relic Synthetic Monitor.
Run every 5 mins.



Monitor.
Run every 5 mins.
HTTP Req.
EC2 web App.
Validate HTTP Response.
