Day - 4

29 October 2026 10:12

1. NRQL → 2nd Half

2. Alert → First Half

① Alert - Proactive detection APP Degradation, Infra failure, High response, times, Java exception, failed Synthetic Test & Missing Telemetry.

Workflow → Notification Destination
(Email | Slack | PagerDuty | Webhook.

Components of Alert:

Typical Alert

① Alert Policy. → Condition

② Alert Condition. → Define Metrics | Signal to evaluate.

③ NRQL Query. → Select telemetry to monitor.

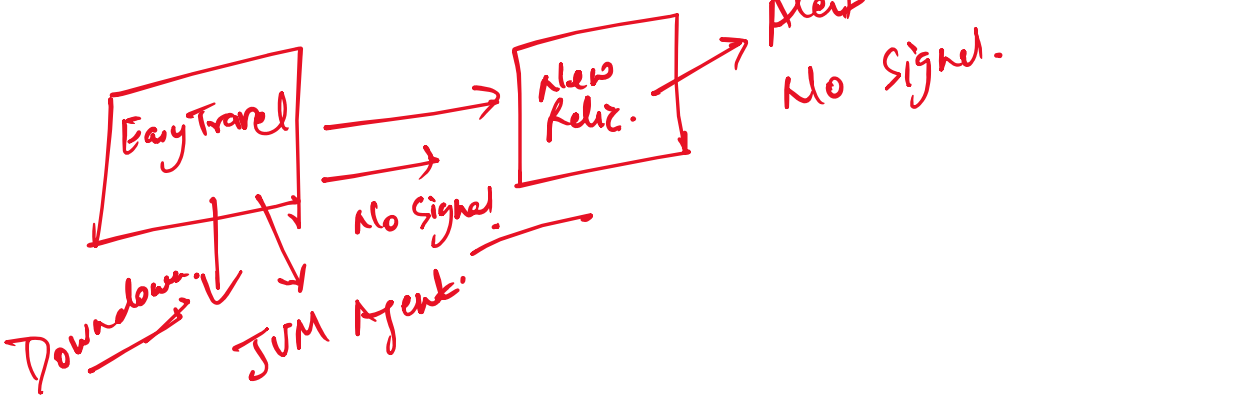

→ Define Warning or Critical level.

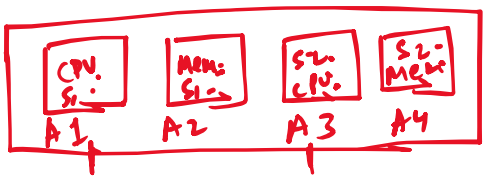

→ ... is grouped.

(5) NRQL Query. →
(4) Threshold → Define Warning or Critical
(5) Aggregation Window. → Incoming Telemetry is grouped.
(6) Threshold Duration. → Threshold Must is violed.
(7) Alert event. → Detected violation.
(8) Issue. → Group up related events
(9) Workflow → Where Notification are sent.
(10) Destination →

Type of Alert Conditions:-

(1) Static Threshold. → CPU exceed 90%
(2) Anomaly Detection → Compare historical Data.
(3) Loss of Signal. → JVM stops Reporting Telemetry.
(4) Synthetic failure. → Website check fails.
(5) NRQL Based Business alert. → Booking error exceed 5%

Easy-Travel-Policy.

At 10 AM

(1) One Issue per Policy.

Policy : ET-Policy → 1 issue

Issue 001

A1
A2
A3
A4

(2) One Issue per Condition.

Policy : ET-Policy → 2 issue

Issue 001
A1 → S1 CPU
A3 → S2 CPU

Issue 002
A2 → S1 Mem
A1 → S2 Mem.

S2 → Prim.
S2 → Sec.
ET-APP

(3) One Issue per Cond. ← signal

Policy : ET-Policy.

Issue #001
CPU: S1

Issue #002
CPU: S2

Issue #003
Mem: S1

Issue #004
CPU: S1

4 issue

Memory → 30%.

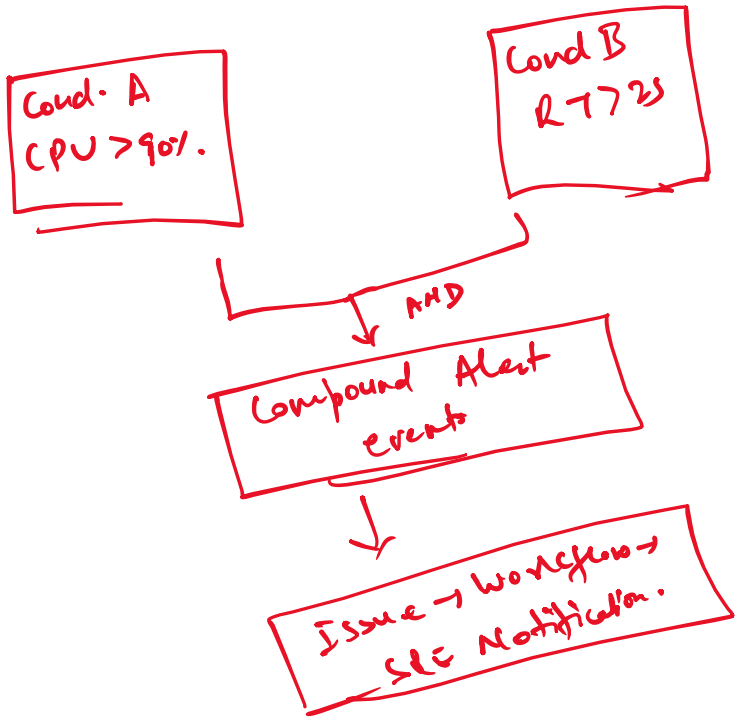

5 min → 5 times.
↓
3 times → > 30%.
↓
Trigger.

Compound Alert:— two or more existing Alert Condition → logical operation

• NOT.

Condition → logical

AND, OR, NOT.

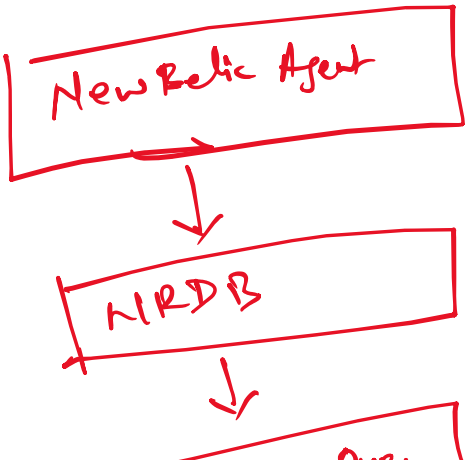

NRQL → New Relic Query Language.

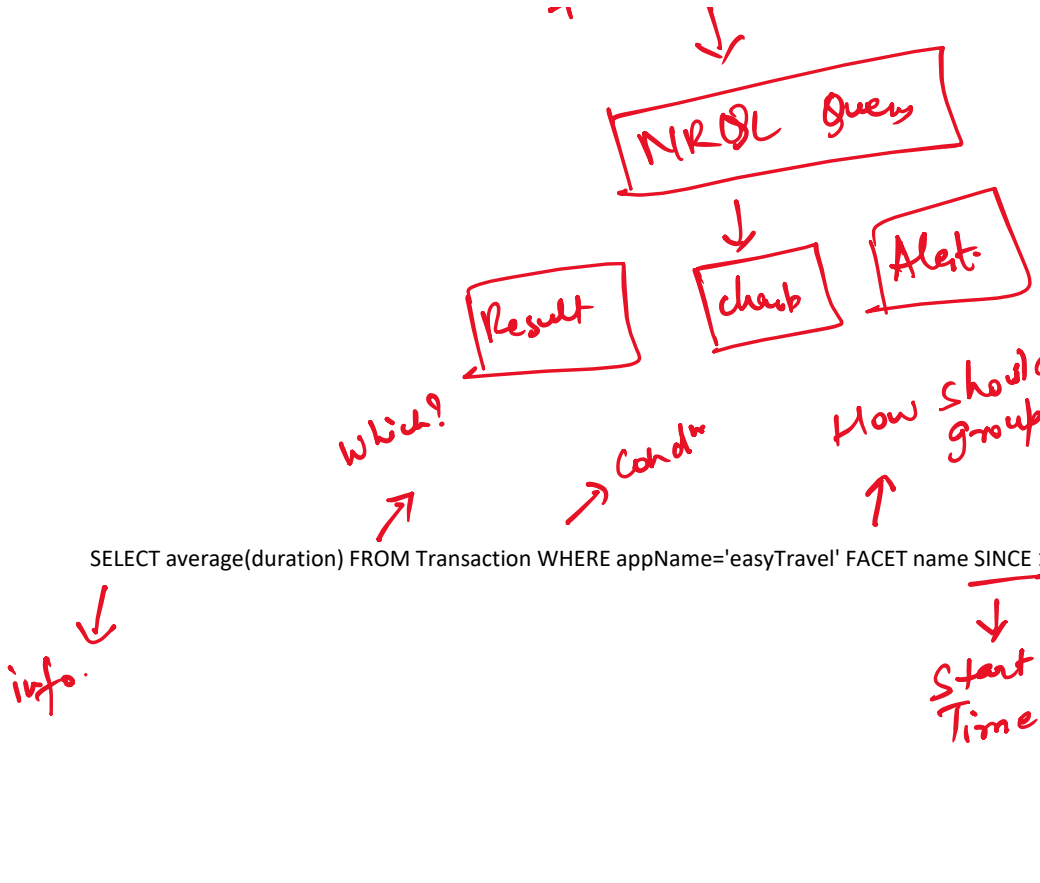

↳ MySQL

Splunk → SPL
Dynatrace → DQL
Appd →
NewRelic → NRQL

① Event → Log

② Metrics → CPU, Memory

Aggregations:-

1. count
2. average
3. min
4. max

Facet & Grouping:-

SQL → GROUP BY
SPLUNK → VALUES, List
NRQL → FACET

Time Series:-

Values over consecutive time windows.

Advanced Aggregation fun^n:-

1. Percentile()
2. percentage()
3. filter()

Advanced

(6) apdex()
(7) funnel()

(2) p...
(3) filter()
(4) rate()
(5) histogram()

Troubleshooting :-

(1) AJAX
(2) Logs
(3) span

Regex, Parsing & Transformation :-

(1) RLIKE
(2) WITH

Tomorrow

(1) Subqueries, Nested Aggregation & Join
(2) Dashboard., SLI | SLO | SLA, error budget, Toil
(3) Review TOC
(4) Post Quiz.
